

Host phase

Windows 11 laptop

Windows 11 laptop

Applications

Microsoft Word (augloop)

DeepL desktop

Edge / Copilot

Grammarly desktop

System proxy

WinINET + WinHTTP
→ 127.0.0.1:8080

mitmproxy

(same add-on)

Vendor servers

augloop.svc.cloud.microsoft

capi.grammarly.com

www2.deepl.com

copilot.microsoft.com

WinHTTP is the key

native apps (Office, Grammarly desktop) bypass a browser-only (WinINET) proxy. Every flow is attributed to its destination host, so a leak is credited to the tool responsible, not to whatever else runs.
